DESIGNERS' CHOICE

Choose from our wide collection of mirrors and cabinets with a host of useful features such as **Bluetooth®** wireless technology, heated demister pads and integrated recharging sockets.

CHOOSING THE RIGHT MIRROR

Choosing an illuminated mirror will help enlarge even the smallest of spaces, reflecting light around the room and brightening your day. A host of useful features such as **Bluetooth®** wireless technology, heated demister pads and integrated recharging sockets will make you wonder how you ever managed without one.

LIGHT TEMPERATURE CHANGING TECHNOLOGY

This lets you create the perfect bathroom environment by enabling you to adjust the warmth of your mirror illumination to suit both the task in hand and time of day. Kick-start your day with bright, invigorating daylight. Then choose a natural light to apply make-up and a warm light for sleepy late evening tasks.

Light temperature ranges from 2700K (Warm White) to 6000K (Daylight White). You can also adjust the intensity of the light to be as bright or as dim as you wish.

BRING MUSIC TO YOUR BATHROOM

Catch up with the morning news during your shower or listen to your favourite playlists with **Bluetooth®** wireless technology. Easily pair your device to one of our innovative music mirrors featuring quality integrated speakers.

FOR YOUR CONVENIENCE

A convenient integrated recharging socket, suitable for electric shavers and toothbrushes is included with our Realm mirror.

STEAM FREE

Many of our mirrors feature a heated demister pad to keep your mirror steam-free. You'll really appreciate never having to wipe it down again!

The heated demister pad heats the mirror to a few degrees above room temperature within 2-3 minutes, preventing the mirror from misting in even the steamiest of bathrooms.

TOUCH FREE OPERATION

Many of our mirrors have an infrared on/off switch which lets you activate the lighting without even touching your mirror. Simply move your hand in front of the sensor to activate.

Important: When mounting mirrors with infrared switches, the sensor must be at least 150mm from an adjacent wall or obstruction to ensure the switch can function properly.

SOMETHING TO SUIT ALL BATHROOMS

We always think about how you may need to use our products, given both space constraints in bathrooms and design choices. We have a wide selection of mirrors in different shapes and sizes so there is bound to be something just right for your bathroom, no matter how big or small.

BATHROOM SAFETY

Tavistock mirrors have been tested for compliance with electrical equipment safety regulations. Our illuminated mirrors are IP44 rated and suitable for use within the bathroom.

SLE500	£313.00

CHOOSING THE RIGHT CABINET

If you're looking for additional storage, a mirrored cabinet can help to create a calm, clutter-free space. Tavistock has an extensive collection of cabinets with a host of useful features to choose from. Heated demister doors keep things steam-free and light temperature technology puts you in control of the illumination of your bathroom.

LIGHT TEMPERATURE CHANGING TECHNOLOGY

This lets you create the perfect bathroom environment by enabling you to adjust the warmth of your cabinet illumination to suit both the task in hand and time of day. Kick-start your day with bright, invigorating daylight. Then choose a natural light to apply make-up and a warm light for sleepy late evening tasks.

Light temperature ranges from 2700K (Warm White) to 6000K (Daylight White). You can also adjust the intensity of the light to be as bright or as dim as you wish.

STEAM FREE

Many of our cabinets feature heated demister doors to keep your cabinet steam-free. You'll really appreciate never having to wipe it down again! The heated demister pad heats the mirrored doors to a few degrees above room temperature within 2-3 minutes, preventing them from misting in even the steamiest of bathrooms.

COMPLETE HARMONY

Aluminium bathroom cabinets work well with all basin units, however we have a number of cabinets with a gloss white finish which will coordinate with your Tavistock bathroom furniture.

PERFECTING THE AMBIENCE

Dimmable lighting has been added to a number of our cabinets to allow you to control the brightness of the light in your bathroom no matter what the time of day or night.

INTUITIVE TECHNOLOGY

Our Slide cabinets feature an intuitive touch slider switch which enables you to adjust both the warmth and brightness of the LED lighting. Simply slide your finger up and down the sensor to operate.

SOMETHING TO SUIT ALL BATHROOMS

At Tavistock we are mindful that bathrooms come in all shapes and sizes. That's why we have ensured our cabinets offer a selection of sizes to suit any bathroom, no matter how big or small.

RECESSED CABINETS

Recessing the cabinet within the wall or partition is a great way to conceal and store all of your bathroom accessories whilst maintaining a clean and clutter free bathroom.

CABINET PRODUCT GUIDE

SAFETY IN THE BATHROOM

Mirrors Technical Information
Tavistock illuminated mirrors have been designed and tested for compliance to electrical equipment (safety) regulations.

All electrical connections should be made according to the latest national wiring regulations. Illuminated mirrors are suitable for installation in the bathroom within outside zones unless stated. Mirrors which are IP44 water resistance rated are suitable for use in zones 2 and outside zones in the bathroom. Illuminated mirrors are not suitable for installation in saunas, steam rooms, shower cubicles or above a bath tub. Products are only suitable for permanent installation. Installation by a suitably qualified electrician is required.

Cabinets - Electrics
Our illuminated cabinets have been designed and independently tested for compliance to electrical equipment (safety) regulations. They are only suitable for use outside zones 1 & 2 according to the latest IEE regulations. All cabinets are class I insulated and require an earth connection.

Infrared Sensor
All mirrors or cabinets featuring infrared technology must ensure that the sensor is mounted a minimum of 150mm from an adjacent wall or obstruction to ensure correct function.

ZONE 1

Electrical fittings in this zone require separated extra low voltage and a minimum rating of IP44 (splash proof).

ZONE 2

Electrical fittings in this zone require a minimum rating of IP44 (splash-proof).
