FINISHING GUIDE

Standard & Selected Bespoke Colours - Painted rails are sandblasted prior to powder coating, which greatly increases paint adhesion. We only use Akzo Nobel paint, one of the World's highest quality paint manufacturers. Bespoke colours have an estimated 8 week lead time.

Quartz Finishes - With so many colours and finishes to choose from, the Quartz glass fronted ranges can be utilised in any part of the house. Whether you want a mist free-mirror in the bathroom or a radiator to match your tiles, splashbacks, furniture and more, these glass-fronted radiators can offer the perfect solution. Quartz Radiators available on p-70 - 74. Quartz finishes have a 3 week lead time.

Highest Quality Chrome Plating - Double Nickel & Chrome plated. No Copper Cyanide - we never use any copper plating in the production of our towel rails/radiators. Copper plating produces harmful by-products such as copper cyanide, which has a devastating effect on the environment. TIG welded ends are stronger and reduce the likelihood of pinholes and crooked tappings. Welding & brazing not furnace welded. This allows for better plating cover around the horizontal and vertical joins on our towel rails, which minimizes chrome shadow, greatly increasing the corrosion resistance life of the rail.

Stainless Steel - So confident are we of the robust quality of our stainless steel, we are prepared to guarantee it for 25 years. Made from 100% recyclable, eco-friendly, 304 Marine Grade stainless- an excellent choice when corrosion resistance is important- our towel rails are suitable for fitting on most types of heating systems and will provide higher heat output than the equivalent sized chrome plated options.

Finish Type	Lead Time	Price	Price (if NO Chrome in Range)	Price (Stainless Steel Towel Rails)
Bespoke Colour	8 Weeks	Same as Chrome	Same as Black Pearl	10% Surcharge
Quartz Glass Front	3 Weeks	See Page 70- 74	NA	NA
Brushed Stainless Steel	8 Weeks	15% Surcharge (only on Stainless Towel Rails)	NA	15% Surcharge
Polished Nickel	3 Weeks	Chrome +30% (min. £75 + VAT)	NA	30%
Brushed Nickel	3 Weeks	Chrome +40% (min. £100 + VAT)	NA	40%

PREMIER XL CURVED

Stainless Steel

The Premier XL Curved towel rail allows for easier towel storage. Its 304 marine grade stainless bars are individually hand curved before assembly giving the rail greater aesthetic appeal. As well as this, it has a full complement of 22mm cross bars and 38mm collectors.

ELECTRIC OPTIONS

Standard Electric Only Option: to be added to chosen towel rail

Once you have chosen your desired radiator, choose your electric option. The cost of your chosen electric option should be added to the cost of the radiator. Your radiator is then converted into a sealed electric unit, ready to be connected to your electric power supply.

The Standard Electric option does not come with an adjustable temperature control. We recommend employing the use of a wall plate controller, so that you are able to adjust the output of your radiator.

The elements used in standard all electric radiators are rated **IP55**.

Important Information:

Internal Operating Temperature Range of towel rail or radiator using this element: **65°C** (note: with standard electric elements, the surface temperature of towel rails (specifically chrome plated towel rails) can get hotter than **65°C** (up to **70/80°C** in some cases) due to various factors (capacity, surface area, material type etc). Consider thermostatic or other regulatory devices if surface temperature could be an issue for you. *Electric radiators should only be fitted in the bathroom by a qualified electrician, in accordance with IEE regulations. They should not be installed within 1.2m's of bath, shower or other wet area.

*Prices to be added to cost of the radiator.

Standard Summer Heating Dual Fuel Kit: to be added to chosen towel rail

Summer Heating Dual Fuel kits enable you to use your towel rail on your central heating system or as an electric option, when the central heating is not being used. Simply ask your fitter for operating instructions.

The cost of your chosen Dual Fuel option should be added to the cost of the radiator. Radiator valves will also be required for Dual Fuel Radiators (please see pages 76 & 77).

The Standard Dual Fuel option does not come with an adjustable control. We recommend employing the use of a wall plate controller, so that you are able to adjust the output of your radiator.

The elements used in standard Dual Fuel options are rated **IP55**.

Designer Radiators & Towel Rails

Returns Policy

Items are expected to be returned in their original packaging and should be returned within 7 days; 20% re-stocking charge on returns will usually apply, but this will be handled on a case-by-case basis. Items delivered must be checked for damages and/or aesthetic imperfections BEFORE installation.

Installed items are deemed to be 'accepted' and are non-returnable. Made-to-order items (bespoke sizes and finishes, glass radiators and electric towel rails and radiators) are non-returnable.

Any discrepancies with orders (size, finish, quantity, etc.) should be reported within 48 hours of receipt.

Please check your delivery carefully. If you notice any signs of damage to the items or packaging, please sign for the goods as 'damaged' as a precaution and report this to Radox Radiators Ltd immediately.

Carriage

Orders totalling a value of less than £50 will incur a £5 +VAT carriage charge. Large, heavy and fragile items may incur a carriage charge- please contact the sales office to confirm.

Important

*Radox reserves the right to change designs and specifications in the interest of product development without prior notice.
*Custom made items are non-returnable – this includes electrical items. Please contact the office for further information.
