BATH

Fitted Furniture 01 | 2020

FITTED FURNITURE

Roper Rhodes has been providing quality products for British bathrooms for over 40 years.

We invest heavily in developing new ranges that combine good design, functionality and style so you can be sure your Roper Rhodes bathroom is fit for purpose day after day.

We are recognised throughout the industry for our excellent customer service. We carry good stock levels on all our standard ranges so, once you've confirmed your order, you won't have to wait long for delivery. And we're so confident in the quality of our products that they come with a 10 year guarantee against manufacturing defects.

THE PERFECT FIT

Whatever your bathroom space, big or small, our fitted furniture offers the flexibility and versatility you need to create the perfect fit.

Fitted furniture helps create a unified bathroom look as well as maximise your bathroom's available space, but with our stunning collection it needn't be frumpy. Fresh, contemporary finishes, coordinating worktops and thoughtful finishing touches abound.

All furniture benefits from a 10 year guarantee.

WHY CHOOSE US?

Offering quality, excellent service and availability are our prime objectives.

We are always seeking to improve our existing high level of customer service and constantly monitor the way our staff fulfil this objective. We offer simplicity in the ordering and pricing of our ranges to make this as easy for you as possible.

We carry good stock levels of our standard items to provide excellent availability of product to our customers. This means that when you order a fitted bathroom from us you can expect to receive your bathroom furniture within three working days.

HEATED DEMISTER PAD
Make steamy mirrors a thing of the past. The pad will heat the mirror within 2-3 minutes, preventing it from misting

10 YEAR GUARANTEE
All fitted furniture units come with a 10 year guarantee against manufacturing defects

COORDINATE YOUR LOOK
A natural oak worktop matches the internal carcass recommended for use with most of the Burford range

SOFT CLOSE
A quieter life is guaranteed with the added luxury of soft close doors and drawers

PLANNING YOUR BATHROOM

At Roper Rhodes we want to make your life easier. There are a few key elements you should consider when planning your new bathroom.

With our fitted furniture it is easy for you to design and plan your new bathroom. What's more we have simplified the ordering procedure into a series of basic steps for you to follow, see pages 8-9.

What look do you want to create?
A range of styles can be created from one unit, whether it is wall hung for a more modern, European feel, or used with the supplied plinths to create a fully fitted wall-to-wall effect.

Please remember that the photography shown in this brochure is only an example of what can be done.

Decide on the finish and colours
Lighter colours such as high gloss white, chalk white and alpine elm finishes are particularly effective in smaller bathrooms. Colours such as washed oak or mercury can be used to create homely effects. Painted finishes are very on-trend. Don't forget you can order a

different colour carcass to door finish, creating an individual look. There is a choice of 4, including white, silver, graphite and natural oak.

FITTED FURNITURE PRODUCT DETAILS

Slim depth units

All slim depth units are 820mm(h) x 218mm(d) with the exception of the full height unit which is 1900mm(h)

					
Back to wall WC units	Basin units with 2 doors	Floor units	Toilet Roll Holder	Shelf Unit	Full height 2 doors
500mm 600mm	500mm 600mm 700mm	200mm 300mm 400mm	200mm	300mm	300mm

Standard depth units

All standard depth units are 820mm(h) x 353mm(d) with the exception of the full height unit which is 1900mm(h)

Mirrors							
500mm 600mm* 700mm* Air 560mm*							

* Heated mirror pad supplied with mirror

Which worktops?

There are so many finishes to choose from. Premium matt, soft touch laminate worktops are superbly tactile while our gloss finish black granite and white laminate worktops will sparkle under LED lighting.

Using Strata solid surface worktops will add a more contemporary and luxurious look and feel.

The layout of your bathroom

Get a feel for your bathroom layout before you start. Look at any wasted areas which could be maximised with the addition of storage units. It is advisable to install a WC unit in a similar position to the current WC to minimise installation costs.

If you do want to change the layout of your bathroom, a good bathroom retailer will be able to guide you through the planning process.

Installation

As with any new bathroom furniture, it is advisable to use an experienced and qualified installer. Many Roper Rhodes retailers will be able to offer a design and installation service or will be able to recommend suitable fitters and tradesmen.

Use the item guide above to populate your new bathroom layout.

STEP-BY-STEP ORDERING GUIDE

With our versatile fitted furniture and huge choice of additional bathroom product it is easy to create your unique bathroom. One which will fit not only your personal style, but also the space and more practical needs that you have.

Use our step by step guide to help create your perfect bathroom.

One of the most important choices when determining the look of your bathroom is door style. Choose from the classic shaker styling of Burford to the ultra-modern simplicity of Aruba slab style doors. Door finish will also greatly influence your overall design. There are many fabulous choices to select from, covering all bases from on-trend painted finishes to natural wood looks. Browse through pages 12-59 for inspiration.

Your step by step guide to creating your perfect fitted bathroom

1. Define Your Style
Choose your preferred door style and finish from our 4 fitted furniture ranges.
2. Internal Finish
Select your internal carcass finish from 4 available colourways.
3. Your Bathroom Space
Configure the number of units and depth of furniture to fit your bathroom space.
- 4-6. Designed For You
Choose from our wide choice of handle and worktop options and basin and WC styles to create a unique bathroom.
7. Finishing Touches
Don't forget colour-matched end panels and plinths to complete your furniture run.
- 8-11. Complete The Look
Complete your bathroom design with your choice of tap and mirror or cabinet.

01 Define Your Style

Burford

The timeless look and feel of traditional carpentry with all the advantages of fitted furniture. Burford can be styled to either keep things classic or add a more contemporary twist.

Aruba

For pared-back style, inject some colour into your bathroom with the sleek ultra-modern flat door design of Aruba.

Vetro

The glass-like finish of Vetro's ultra-glossy doors lend a sharp, contemporary edge.

Capella

The subtle curved door edges give Capella broad appeal.

STEP-BY-STEP ORDERING GUIDE

02 Internal Finish

Now select your internal carcass finish. The recommended carcass colour to be used with each door finish for best effect is detailed on pages 92-108, but you can choose to order whichever carcass colour you wish to achieve your desired look.

White

Silver

Graphite

Natural Oak

03 Your Bathroom Space - Choose Unit Combinations & Depth

Assess the space you have available in your bathroom and choose from standard depth (353mm) or space-saving slim depth (218mm) units. Consider which combination of units work for the space of your bathroom.

04 Designed For You - Handle Options

Add the perfect finishing touch to your doors with one of our range of handles. Your choice includes chrome, brass and matt black options. See pages 86-87.

05 Designed For You - Worktop Options

Select a worktop from either our Strata solid surface or laminate options. Alternatively opt for either the solid surface City underslung basin or Motif semi-recessed basin. Both have an integrated worktops for a seamless look which works equally well with both contemporary and classic bathroom designs. See pages 80-85 for further details.

06 Designed For You - Basin & WC Options

Choose your preferred sanitaryware to match the styling of your bathroom. See pages 62-77 for options.

07 Finishing Touches - Colour-matched Panels & Plinths

Don't forget your end panels. Colour-matched to complete your furniture.

Coordinating clad-on end panels or thicker design panels are available in all finishes. These are optional when choosing a range with a colour-matched carcass. If you select a range with a contrasting coloured carcass you will need to use end panels to cover the exposed unit sides. Design panels can also be used between units to achieve a framed effect. See pages 113-115.

08 Complete The Look - Mirror & Wall Cupboard Options

Choose your preferred mirror, and maybe also add some useful wall cupboards for extra storage. See pages 115-116.

09 Complete The Look - Lighting Options

Choose your lighting. See page 116.

10 Complete the Look - Bath Panel Options

Coordinate your bath panels. See page 115.

11 Complete the Look - Tap options

Top your basin with our well-engineered and stylish basin mixers. See pages 88-89.

PETER LINDELL
Product Designer

Whatever your bathroom space, big or small, our fitted furniture offers the flexibility & versatility you need to create a unified bathroom look. Our range has something for every taste & the designs incorporate a host of thoughtful features, functionality & style.

Fitted Furniture

BURFORD

*Elements of traditional carpentry
with the advantages of fitted furniture
in a range of painted finishes*

BURFORD CONISTON BLUE

Define your style with this muted tone of Burford Coniston blue to create a visual statement, balancing modern and traditional styling.

Complete this classic style with a double basin. Ideal for those wishing to make a real design statement and very practical as well. Opt for the Keswick taps and Westport door handles to complete this look and create a beautiful balance between classic styling & dramatic good looks.

Alternatively Coniston Blue works equally as well with more contemporary basins and WCs for a timeless look.

For a seamless design include an oval furniture flush button from page 72.

10 year guarantee.

ROB SHEAN
Product Designer

Whatever style you choose, we have a number of sanitaryware ranges designed to coordinate beautifully. Manufactured using only the finest materials, our carefully selected ranges have true designer appeal & complete the look.

Sanitaryware

ARCHETYPE

To perfectly complement your fitted furniture choose Archetype, the very epitome of style and simplicity. Both of the space-saving short projection back to wall WCs offer hygienic, easy to clean rimless technology. The comfort height option sits several centimetres taller than standard WCs. Our oval flush button is a specific design for furniture installations, giving a large flush interface without being obtrusive. Semi-countertop basin options will work with standard or slim depth furniture.

Designed to work with furniture back to wall WC units. Optional upgrades for torrent cisterns.

*Not compatible with Comfort Cistern when used in Slim Depth furniture

SENSOR FLUSHING

Touch Sensor Dual Flush Plate

Go for the ultra-contemporary option with our sleek, black glass-fronted touch sensor dual flush plate. The lightest touch on the plate is all that is required to initiate the flush, and the plate lights up to indicate activation.

The sensor plate is best for use on Roper Rhodes wall hung WC frames or the in-wall concealed cistern, and requires 4 AA batteries which will last around a year under normal domestic conditions. The plate allows easy access to change the batteries when required and has a manual override.

210(w) x 137mm(h)
Black TR9016 £138.00

Contactless Dual Flush Sensor

The contactless flush sensor kit is compatible with pneumatic concealed cisterns from Roper Rhodes, and is best used within furniture. It provides a touchless flush, with just a wave of a hand.

The sensor works using capacitive sensor technology to detect a change in the electromagnetic field. A short wave of the hand in front of the sensor activates the reduced flush, whereas holding your hand up slightly longer triggers a full flush. It is powered by 4 AA batteries which will last around a year under normal domestic conditions.

The sensor can be mounted behind a back to wall WC unit fascia, or under a worktop or tiled wall near the cistern. A choice of discreet black or white decals are included to indicate sensor location if desired.

Use with concealed cisterns

Sensor kit TR9014 £115.00

STEP-BY-STEP ORDERING

Don't forget the finishing touches with matching plinths and panels through to complementing your design with a choice of mirrors, cabinets, lighting and taps.

Finishing Touches

WORKTOP OPTIONS

You have a choice of worktop styles, materials & finishes which perfectly complement our fitted furniture ranges.

Recreate the depth of natural stone with a Strata solid surface worktop. Choose from our extensive range of high quality, durable laminate surfaces, also available in a premium soft-touch option. Or give a smooth, uninterrupted finish to a fitted furniture run with a basin & integrated worktop, for a distinctly contemporary look & feel.

Strata solid surface

City basin

Soft touch laminate

STRATA SOLID SURFACE WORKTOPS

Strata worktops are an ideal solution for those wishing for an aspirational look & the feel of solid surface. The natural stone-like beauty of Strata solid surface makes them a perfect choice for your bathroom.

Strata worktops are completely solid and can be cut to whatever size or shape your bathroom demands, with no need to bond on finishing strips. Simply cut to the desired profile and sand down the end to a fine finish. Adhesive is also available in coordinating colours for joining longer runs or corner installations.

As with any solid surface product, darker finishes will show some scratches over time, however these can be very easily sanded and polished out to keep your worktop in pristine condition.

10 year guarantee.

BASINS WITH INTEGRATED WORKTOPS

Expertly moulded into a single piece, our basins with integrated worktops strike the perfect balance between form & function. Choose from the City basin or opt for the semi-recessed Motif basin style for a clean, minimalist look.

CITY BASIN

The natural beauty of the solid surface worktop flows effortlessly into the deep, spacious wash basin.

Provided in 1640mm length, the worktop can be cut down to size to suit your installation and finished so that exposed ends can be visible. To be used with 600mm semi-countertop units only, with a maximum furniture run of 1620mm including end panels. It works equally well with both classic and contemporary bathroom designs.

Right
City Basin
Solid surface basin with integrated worktop.

MOTIF BASIN

The Motif basin is available in 1640mm length and the worktop can be cut down to size to suit your installation and finished so that exposed ends can be visible. Available in standard or slim depths and left or right handed versions. Motif is to be used with 600mm semi-countertop units only, with a maximum furniture run of 1620mm including end panels. It works equally well with both classic and contemporary bathroom designs.

SOFT TOUCH LAMINATE WORKTOPS

Pleasant to the touch, these super matt, premium laminate worktops are available in two on-trend shades. At 22mm they are slimmer in profile than standard laminate worktops & the smaller edge radius will help to create a striking, contemporary look for the fitted bathroom. The soft touch finish ensures they are easy to maintain, with the added benefit that fingerprints won't show.

TAP COLLECTION

Designed to deliver the finishing touch to your bathroom, our basin mixers are not only beautiful to look at but superbly well engineered for durability too.

From ultra contemporary to more timeless designs, there is something to suit everyone. Many ranges include a mini basin mixer option, very useful for slim depth basins. Most taps also have a coordinating bath filler. Please refer to the main Roper Rhodes Bathroom Book for more information.

All Roper Rhodes taps use the latest highly reliable ceramic cartridge and ceramic disc technology. As testament to this in-built quality, all of our taps are provided with a ten year guarantee.

For matching mini basin mixers, bath fillers and bath shower mixers, please see our Bathroom Book or visit roperrhodes.co.uk

LIGHTING OPTIONS

Creative lighting can greatly enhance a bathroom installation & generate a relaxing ambience.

The bathroom cabinets within our range of furniture feature a void behind the back panel, allowing wiring and transformers to be neatly concealed.

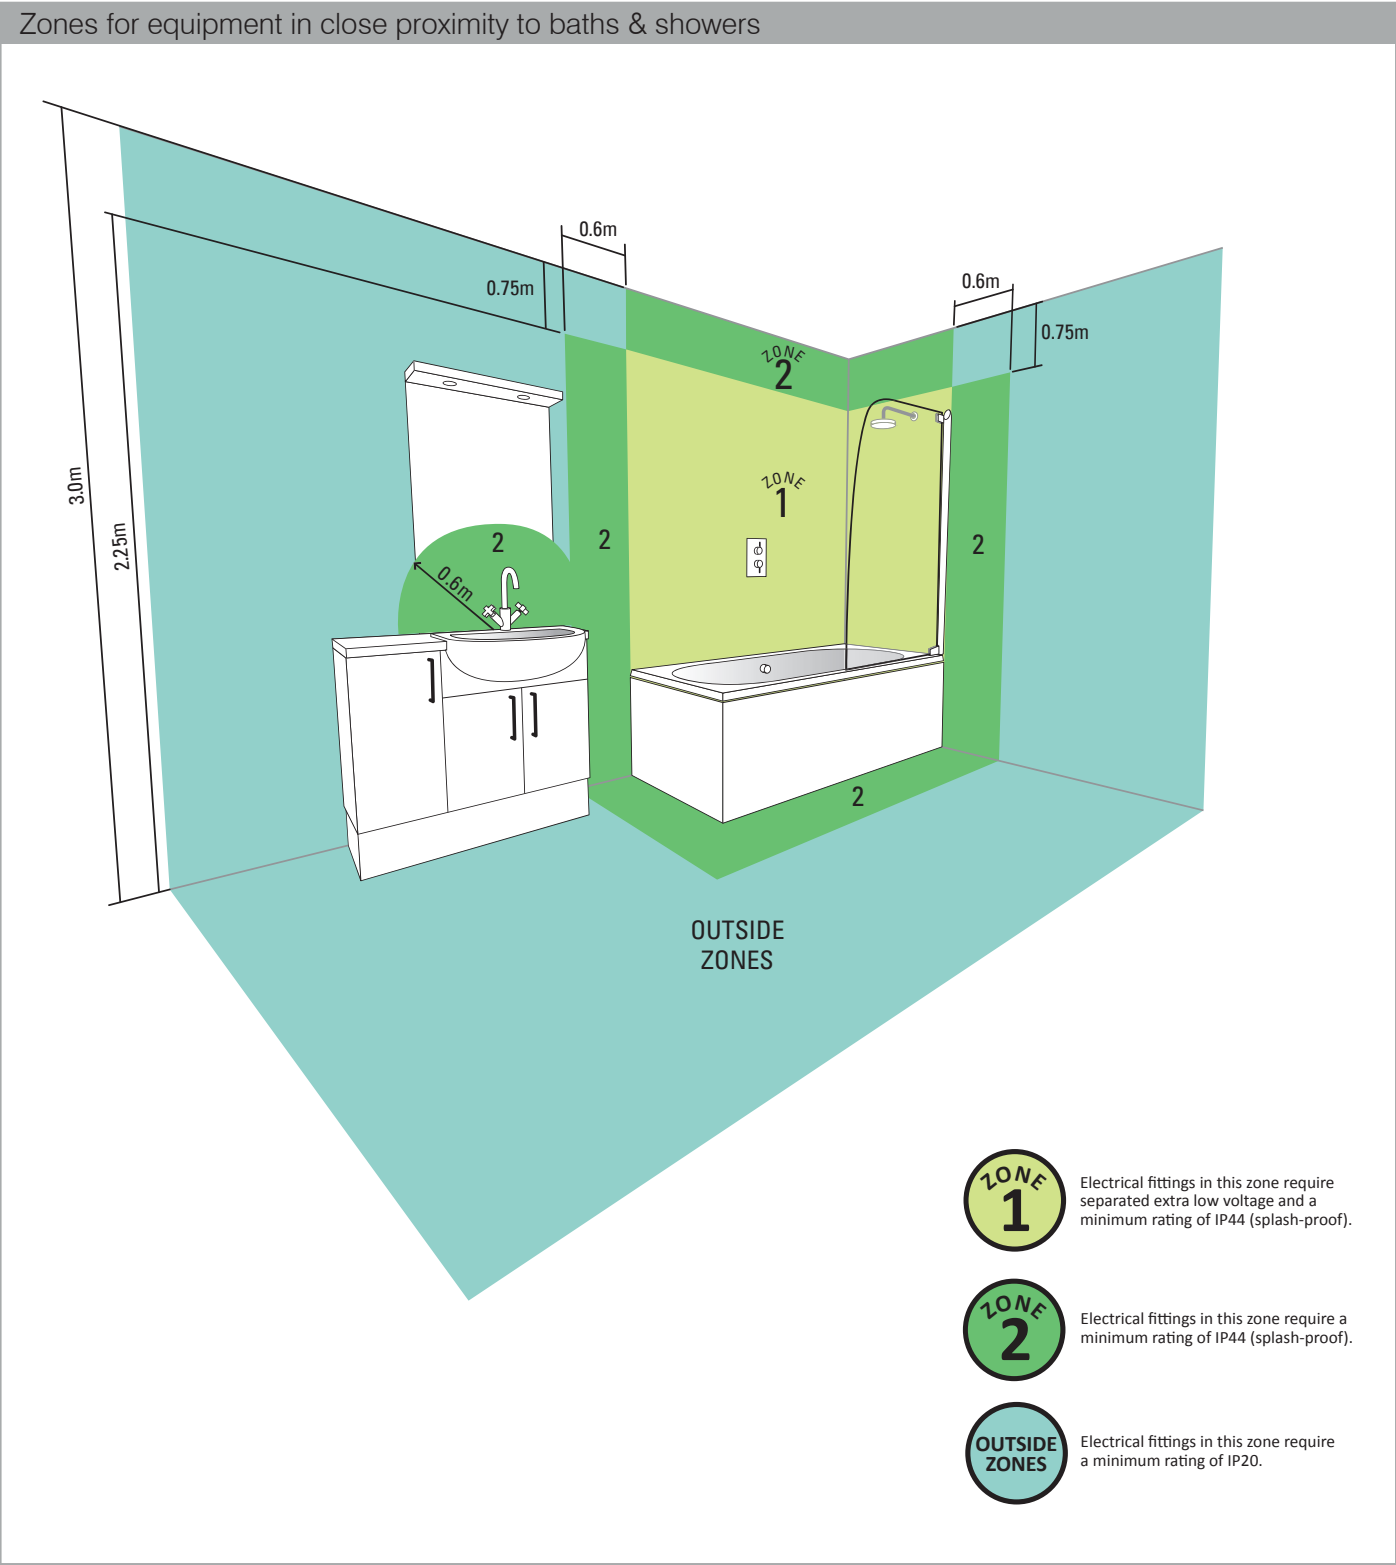

When planning your bathroom remember to make allowance for any electrical work which may have to be undertaken before any of your furniture is fitted. Always use a qualified electrician.

Above
LED Lighting
Choose an overhead light, designed for use on top of cabinets or mirrors. Benefit from the latest LED technology which provides a bright, practical task light with energy saving benefits. The light is IP44 rated and supplied with an LED driver suitable for mounting outside zones 1 and 2. See diagram opposite.

Below
Air Backlit Mirror
The Air backlit fluorescent mirror provides brilliant illumination. With special features such as a heated mirror pad, infra-red on/off switch and a recharging socket, it more than deserves its place in your bathroom. For alternative options see pages 114-115.

LIGHTING SCHEMATIC

Technical Information

STANDARD DEPTH UNITS

500mm standard depth back to wall WC unit with fascia/door pack

Features

- Fascia to be cut on site to suit sanitaryware
- Main panel goes to floor
- Front access top fascia
- For compatible back to wall WCs see pages 118-120

* These fascia packs are designed to be used with comfort height WC pans & cisterns, so exclude the Burford moulding

PLANNING TIPS AND ADVICE

LOCATING THE MAIN ITEMS

Wherever possible, try and install your WC, basin, bath and/or shower in a similar position to that in your current bathroom in order to minimise installation time and costs.

Planning - Key Steps

- Measure your bathroom and draw out a plan, to scale if possible.
- Make reference to where all services are located including soil pipes and water inlets.
- Ensure all dimensions of heights/widths of windows and radiator positions are marked up on your plan.
- Take note of the direction the door opens as this could affect your layout. If it is a hindrance, your door could easily be re-hung by a professional to allow more flexibility.

Once you have the outline of your bathroom, you can experiment by placing different units within your plan. See page 7 for full details of the different sized units available. If you have an odd space at one end of a run of furniture, for example if fitting between two walls or a wall and a bath, then filler panels can be used. The worktop can run across the top of the furniture between the two walls to create a continuous look. Roper Rhodes storage shelf units are supplied in a flat pack format, allowing your installer to cut down the width of the shelves and base components from the nominal 300mm width so that the unit can be customised to suit any size.

When you are happy with your initial design layout, take it to your Roper Rhodes stockist. Your retailer may come up with some further design ideas which may help inspire you.

Corners

If due to the size of your room there is an odd space, then two pieces of filler panel can be used to space the units as necessary.

Worktops can be fitted together on top of your corner configuration using a mason's mitre jig and worktop jointing bolts. Your bathroom fitter will be able to advise further.

WC Units

The use of a WC unit and concealed cistern can create a clean uncluttered look for your bathroom. Dual flush concealed cisterns available from Roper Rhodes operate by a pneumatic push button which can be sited in the front removable fascia of the WC unit, or on the top of the unit if desired.* Our WC units feature a panel which goes to the floor, removing the need for unsightly filler blocks that are sometimes used to fill the void between the back to wall WC pan and the plinth. As a consequence, it is recommended that when fitting commences, the WC unit height is set first with the other units running off. If the floor of the installation is uneven, then the main fascia panel can be scribed to fit.

If a wall hung WC pan is required, then a suitable supporting frame must be used see page 73. Never fit a wall hung pan directly to the fascia of a WC unit only. Speak to your retailer for more details on compatibility.

Basins

Roper Rhodes semi-countertop basins are available in both slim and standard depth formats and can be mounted on both laminate and solid surface worktops by an experienced fitter.

Slim Depth Furniture

The key units within the Roper Rhodes Fitted Furniture range are available in both standard and slimline formats. Using slimline furniture in small ensuites or cloakrooms can help maintain vital space in the room without sacrificing bathroom storage.

* Only with standard depth WC units. Flush buttons can only be installed on the front fascia of slimline units.

PLANNING TIPS AND ADVICE

Concealing Pipework

One of the benefits of using Roper Rhodes Fitted Furniture is that unsightly pipework can run along skirting boards and walls whilst being concealed behind the units. The furniture is designed with a plinth height of 180mm, which means that even soil pipes can run under the units.

All standard depth base units feature a generous 50mm void at the back, which allows waste pipes and copper pipes to run along the walls whilst being concealed behind the units. Your fitter will only have to notch out the side panel of the unit where the pipe traverses. In addition to the 50mm pipe void, basin units in both slim and standard depth configurations feature a removable back panel to aid the installation process. (See diagrams below).

Electricis

When planning your bathroom, note where any lighting or electrical supply cables are situated. It may be necessary to move these. It is advised that this work is done after the old bathroom fittings are removed but before the new installation begins. Always use a qualified electrician for any work carried out in a bathroom. Your retailer may be able to advise when to schedule an electrician, or consult your fitter or electrician for more advice. Please note that Roper Rhodes cannot give specific advice on electrical installations.

When planning where to locate lighting, it is vital that the IP rating of the device is taken into account as this will affect which zone of the bathroom the fitting can be located in. Your electrician will be able to advise further on bathroom zones and which electrical appliances can be sited where. Remember to allow for the provision of switching for any new lighting.

It is recommended that, whilst you are at the planning stage, you make an allowance for the installation of a suitable extractor fan to remove excess water from the atmosphere. After the furniture has been fitted, plan for an electrician to come back and install light fittings or electrical devices which are used.

Mirrors

Roper Rhodes mirrors (over 560mm wide) feature heated mirror pads to prevent them from misting up. Your electrician can connect the heated mirror pad to the domestic supply so that the pad is switched on and off when your bathroom lighting is operated. Heater pads should not be connected to a permanently live supply. Please note, mirrors must never be installed above a bath or shower.

Plumbing Voids

PLANNING TIPS AND ADVICE

Filler Panels

Filler panels are available to fill gaps at the ends of runs of furniture and to clad ends of furniture for a perfect match.

Clad-on Design End Panels

Clad-on design end panels are available in slim and standard depth configurations and are 25-30mm thick (depending on the finish, see pages 113-115 for further information). Give a different style to your bathroom design by cladding these to the sides of units for a framed look. Design panels are 820mm tall, allowing them to run from the floor to the underside of the worktop if necessary. They can be cut down if base units are wall hung. The slim design panels can also be cut down to be used with wall cabinets or wall cupboards.

You can achieve very different effects by contrasting the panels and fascias of units. Matching colours between doors and accent panels creates a subtle yet 'solid framed' look.

Handles

The comprehensive range of handles in the Roper Rhodes range allows a multitude of looks to be created. Move them into different positions on the door, or change their orientation, to create the look you want on your furniture.

Please note that all doors will require your fitter to drill and fit your handles so that you can position them exactly where you want.

Bath Panels

Designed to complement all door styles. Both front and end panels are supplied with a matching plinth which allows for adjustment depending on site conditions. To achieve a continuous look between the furniture and the bath panel, it is recommended that the panel is set at a height of 520mm, so that a plinth height of 180mm is achieved.

Note: Once installed all bath panels must be sealed along the top, bottom and sides with a suitable silicone sealant to prevent damage from excessive moisture.

Corner Posts (For Bath Panels)

Designed to provide a neat joint on an exposed corner of a bath between front and end panels. The corner posts can also be used to allow larger sized bath tubs to be accommodated with the panels available in the range. A corner post will add 50mm in length to a panel, so using two corner posts would allow an 1800mm tub to be installed.

Please note: Corner posts only available for painted finishes.

TERMS & CONDITIONS

Roper Rhodes Fitted Furniture must be installed by a qualified fitter. In the unlikely event that your product is damaged or faulty in any way, this must be notified on receipt, and must not under any circumstances be fitted. Time must be allowed between delivery and installation for checking items and the delivery of subsequent replacements. Attention is drawn to the policy of replacing any damaged part with a spare part where possible. Complete exchanges will only be made if damage is excessive. We shall not be liable for any further unfitting/refitting costs or financial compensation. Components/products that are deemed defective as a result of incorrect or substandard installation or improper or negligent use will be excluded from any guarantee claim. Roper Rhodes Ltd reserve the right to amend specifications at any time if an opportunity to further improve the product occurs.

All dimensions are approximate, especially with ceramic sanitaryware where a tolerance of +/- 2% must be allowed.

Doors and fascias are supplied separately to the furniture units, to prevent them from being damaged during the installation process. Doors are simply fixed by your fitter screwing the necessary hardware to the backs of the doors or fascias and simply clicking into place on the relevant hinge plate inside the unit. Mirror glass cabinets are supplied with doors installed. Doors are supplied un-drilled for handles due to the wide variety of handles and possible positions. Any competent fitter will be able to fit them in the positions which best suit the design of your individual bathroom. All units are supplied assembled with the exception of the storage shelf units (which can be modified if necessary to fit a smaller gap) and the mirror shelf unit.

All timber finishes featured within this brochure are timber effect. Please note that there may be some slight variation between carcasses, doors and worktops due to different manufacturing techniques used.

Roper Rhodes bathroom furniture is designed for use within domestic installations which are adequately ventilated. As with any timber product, bathroom furniture will be adversely affected if it is subjected to excessive moisture. It is strongly recommended that adequate bathroom extractor fans are installed to prevent heavy condensation and all splashes and spillages must be mopped dry as soon as possible. All exposed or cut surfaces must be sealed with a suitable varnish or silicone sealant to prevent blowing. If this is not done, all guarantee claims will be void. In particular, silicone sealant must be used around basins and worktop joints, and around all edges of bath panels and plinths if the sealer strip is not utilised. All electrical products should be installed by an approved electrician in line with current wiring regulations. Guarantees are for domestic use only and not transferable.
